Media Composer 6.5 and follow the instruction to install Avid Media Composer 6.5.2.Q: Visual Studio Team Services on Remote Server Deployment

Trying to make the migration of our project from TFS to VSTS. The project is being hosted on a remote server (Ubuntu) with MySQL db on it. Tried building the project on VSTS and publish it to remote server but it didn't work. See the screenshot Why can't I build the project successfully? I assume that it's

not available on Remote server.

How can I make it? A: I have stumbled upon the same issue. To be able to run the build the processes used by the mySQL connector must be installed on the remote server. Remote agent 3.1.0 and higher have the mysql connector as a prerequisite, and thus, installable. remote agent 3.1.0 and higher : Contains the MySQL Connector/Python, allowing builds to be executed and automated as Python

scripts. Remote agent 3.0.0 and below : Does not have the MySQL connector. The manual build must be run which is not ideal. There's two different ways to install this package on a remote server. Run the vstestranner deploy command as a prerequisite to the build script. This package is available for download on the MSDN download center and is also offered as a dependency for the MSBUILD extension. Download the x86 package from the

MSDN download center and install manually on the remote machine. See here for more details. UNPUBLISHED UNITED e79caf774b
